Election/Restrictions

1. Applicant's election (although Applicant doesn't specifically elect Group I, cancellation of the claims of Group II is taken as a selection of Group I) of Group I in the reply filed on June 9, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Specification

2. The disclosure is objected to because of the following informalities: the continuation data in the first paragraph of the specification (as amended on April 12, 2004) needs to be updated (i.e., parent application patent number).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 35, term "the pixels" (line 3) lacks antecedent basis.

Claim Rejections - 35 USC § 102

Art Unit: 3739

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 31, 35 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Rosenberg (U.S. Pat. 5,815,624).

Referring mainly to Figures 3 and 4, Rosenberg discloses a method of illuminating a target including the steps of transmitting light (e.g. 47,49,51, Fig.3) for a light source to a proximal end (Fig.3) of a light guide bundle (54) via a spatial light modulator (46) wherein the spatial light modulator transmits the light substantially only to cores of light guides (48,50,52) in the light guide bundle (col.4, lines 43-45), transmitting the light from the proximal end of the light guide bundle to a distal end (Fig.4) of the light guide bundle and emitting the light from the distal end of the light guide bundle, and illuminating the target with the light emitted from the distal end of the light guide bundle (col.5, lines 23-30). As to claim 35, note that the light source will illuminate a substantial portion (e.g. all) of the pixels of the spatial light modulator (46), wherein the centers of the lenslets (42) correspond to pixels of an on-state and areas between lenslets (42) (best shown in Figure 2A) correspond to off-state pixels. As to claim 37, note that light emanating from the distal end adjacent light guides do not “interfere” with each other, as shown by the lines of light in Figure 4 emanating from light guides (48, 50 and 52) and suggested by the respective alignment of the light guides and lenslets (58,60 and 62) (col.5, lines 25-29).

7. Claims 31 and 33 are rejected under 35 U.S.C. 102(b) as being anticipated by Furuya et al. (U.S. Pat 5,430,816).

Referring mainly to Figure 8, Furuya et al. disclose a method of illuminating a target including transmitting light from a laser light source (1) to a proximal end (4) of a light guide bundle via a spatial light modulator (mask plate, col.24, lines 10) wherein the spatial light modulator transmits the light substantially only to cores of light guides in the light guide bundle (col.24, lines 9-14), transmitting the light from the proximal end of the light guide bundle to a distal end (6) of the light guide bundle and emitting the light from the distal end of the light guide bundle (note dashed lines in Figure 8), and illuminating the target with the light emitted from the distal end of the light guide bundle (col.17, lines 51-59).

Allowable Subject Matter

8. Claims 32, 34, 36 and 48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
